D. READING

I)-A new report into teenagers' leisure time has some surprising results. Read it and fill in each blank with the correct figure from the report.

In this digital age, many people think that young adults spend all their time on the computer. And a new government survey of how young adults spend their leisure time says that 87 percent of people in the UK between the ages of 13 to 19 use the Internet every day. But it's still important for young people to go out with friends. And the most popular evening out is going to the cinema: 42 percent say it's their favourite way to spend an evening.

For people who don't go out, not surprisingly, television is more popular than radio. 82 percent say that they watch television for more than ten hours a week – mainly for films and news programmes – but only 23 percent listen to the radio.

Music is always a favourite topic, but it seems that many people listen to music than can play a music instrument. The survey reveals that 38 percent watch live music, but 30 percent of people between 13 and 19 can play a musical instrument.

Only 32 percent of young adults play sports; with football, swimming, and cycling the most popular activities. But that means that more than two-thirds don't play any sport!

Leisure Time Survey of Teenagers In The UK
• (1) percent of teenagers use the Internet every day.
 The most popular leisure activity is going to the cinema: (2) percent
say it is their favourite evening activity.
• (3) percent of people say that they watch TV for more than (4)
hours a week, but only (5) percent listen to the radio.
• (6) percent of young people watch live music, but only (7)
percent can play a musical instrument.
 Only (8) percent of young adults play sports. Football, swimming,
and cycling are the most popular sports.
II)-Read the passage about Phong's weekend and answer the questions.

On Friday's afternoon, after school, I usually surf the Net or listen to music. In the evening I often go to the cinema with my friends.

On Saturday morning I get up late and have breakfast. Then I play football with my classmates in the park. In the afternoon I watch TV (usually a football match). In the evening I go to my best friend's place – we sometimes play computer games, or we talk.

On Sunday morning I do my homework. Then I listen to music or watch TV. On Sunday evening I surf the Net again, or read a book.

X)-Choose the item among A, B, C or D that best answers the question about the passage.

The country is more beautiful than a town and more pleasant to live in. Many people think so, and go to the country for the summer holidays though they cannot live there all the year round. Some have a cottage built in a village so that they can go there whenever they can find the time.

English villages are not all alike, but in some ways they are not very different from one another. Almost every village has a church, the round or square tower of which can be seen from many miles around. Surrounding the church is the church yard, where people are buried.

The village green is a wide stretch of grass, and houses or cottages are built round it. Country life is now fairly comfortable and many villages have running water brought through pipes into each house. Most villages are so close to some small towns that people can go there to buy what they can't find in the village shops.

II)-Read the following passage, and answer the questions below.

Duong Lam: An ancient Vietnamese village

Duong Lam Village is located in Duong Lam Commune at a 45 km distance from Ha Noi. It is the birthplace of two kings in the history of Vietnam, Phung Hung (or Bo Cai Dai Vuong) and Ngo Quyen, who opened up the long-term self-control and independence period of Vietnam after Bach Dang Victory in the year 938.

All houses, gates, village gates and wells are built of laterite creating an architectural complex, a unique village that is typical for villages in the midlands in the North of Vietnam.

At present, there are still nearly old 200 houses and many other historical monuments such as Phung Hung Temple, Ngo Quyen Royal Tomb, Mong Phu Communal House, Ho Gam Hill at which Phung Hung killed tigers to secure villagers and the temple at which the diplomat Giang Van Minh is worshiped.

Jarai (or Giarai)

The largest (38) group on the Central Highlands is the Jarai, with a
population of about 250,000. It is thought that Jarai people left the coastal plains
around 2000 years ago, settling on the fertile plateau around Pleiku, and in Kon Tum
Province. Some ethnologists think that Cham people are in fact a (39) of
the Jarai, and they certainly (40) common linguistic traits.
Villagers are often named for a nearby river, stream or tribal chief. In the centre of each can be found a large (41), which acts as a kind of community centre where the council of elders and their elected chief meet. House are traditionally built on stilt, facing north. Jarai women typically propose (42) to men through a matchmaker, who delivers the prospective groom a cooper bracelet.
Perhaps more than any of Vietnam's other hill tribes, the Jarai are famous for their (43), from stringed "gongs" to bamboo tubes, which act as wind flutes and percussion.
Animist beliefs are still strong and the Jarai world is filled with spirits, the most famous of which are the kings of Water, Fire and Wind, represented by shamans who are involved in rain-making (44) and other rituals. Funeral rites are particularly complex and expensive: after the burial, (45) is built over the grave and evocative sculptures of people, birds and objects from everyday life are placed inside.
Note: evocative (adj) = making you remember or imagine something pleasant.

The Space of Gong Culture in Central Highlands

The space of gong culture in Central Highlands of Viet Nam covers 5 provinces of Kon Tum, Gia Lai, Dak Lak, Dak Nong and Lam Dong. The masters of gong culture are the ethnic groups of Ba Na, Xo Dang, M'Nong, Co Ho, Ro Mam, E De, Giarai... The gong performances are always closely tied to community cultural rituals and ceremonies of the ethnic groups in Central Highlands. Many researchers have classified gongs as ceremonial musical instrument and the gong sounds as a means to communicate with deities and gods.

The gongs are made of bronze. Their diameter is from 20 cm to 60cm or from 90cm to 120cm. A set of gongs consists of 2 to 12 or 13 units and even to 18 or 20 units in some places.

In most of the ethnic groups, namely Giarai, Ede Kpah, Ba Na, Xo Dang, Brau, Co Ho, etc., only males are allowed to play gongs. However, in others such as Ma and M'Nong groups, both males and females can play gongs. Few ethnic groups (for example, E de Bih), gongs are performed by women only.

As for the majority of ethnic groups in Central Highlands, gongs are musical instruments of sacred power. It is believed that every gong is the settlement of a god who gets more powerful as the gong is older. Therefore, gongs are associated to all events in one's life, such as the <u>inauguration</u> of new houses, funerals, buffalo sacrifice, new harvest, ceremony to pray for people's and cattle's health, ceremony to see off soldiers to the front, and the victory celebration.

III)-Read the passage about family traditions in Viet Nam, and do the tasks that follow.

Marriage and family are very important in Viet Nam. In the countryside, parents often arrange marriages; divorce remains uncommon, though is more frequent in cities. In traditional Vietnamese families, roles are rigid. The man of the house is primarily responsible for the family's economic well-being. Older children help to look after younger <u>siblings</u>. Discipline is viewed as a parental duty.

The woman of the house looks after her parents, husband and children. In rural areas, women also do much agriculture work. Vietnamese women live by the "four <u>virtues"</u>: hard work, beauty, refined speech and excellent conduct.

The Vietnamese attach great importance to two traditional family obligations: to care for their parents in their old age and to worship them after death. In each Vietnamese family, there is at least one altar on which there are the pictures of their ancestors. Family members worship their ancestors because they think parents after death will go to live in another world and this altar is the place where the ancestor' souls live in. As a result, every day Vietnamese people lay flowers or sometimes fruits on the altar for the belief that those ancestors will enjoy them.

Task 1: Match a word in column A with its definition in column B, writing the answer in each blank.

Answer	А	В
	1. sibling (n)	A. the part of a person that is believed to continue exist after the body is dead.
	2. virtues (n)	B. to pray to or to show respect for someone like a god
	3. worship (v)	C. behavior which shows high moral standards
	4. altar (n)	D. the table used in ceremonies in a church, temple or

	family	
 5. soul (n)	E. a brother or a sister	

Task 2: Read the passage again, and then	decide whether th	e statements are true (T)
or false (F).			

		Т	F
6.	In traditional Vietnamese families, the man has to support the family		
7.	Children have to share housework with their parents.		
8.	Women in the countryside only looks after their families.		
9.	Children have to take care of their parents in their old age and to worship them after death.		
10.	Everyday Vietnamese people lay flowers or sometimes fruits on the altar because they believe those ancestors will eat the offerings.		

IV)-Read the passage and then decide whether the statements are true (T) or false (F).

Culturally, in Thailand there are many practices and beliefs that are very different to those from other countries.

The Royal Family of Thailand is held in very high respect. Making impolite remarks about any of the royal family is against the law.

The traditional greeting is with two hands prayer-like palms together known as a "wai". If a local gives a "wai" to you, to be polite, it is nice to "wai" back. A "wai", however, is always appreciated.

Thai culture places certain spiritual importance to certain parts of the body. You should not point your feet at people, touch people with your feet, prop your feet up on seats or tables or step over people sitting on the ground. The head, in contrast, has a much higher importance. Avoid touching people on the head as this is considered very rude. You should also avoid sitting on pillows meant for head rests. In some rural areas, food is often served while seated on the ground. Stepping over food on the ground is another extremely rude gesture and will surely embarrass your Thai host.

Throughout all of Thailand, if you notice a pile of shoes at or near an entrance to a home, shop or guesthouse, you should remove your shoes before entry; it is considered rude not to do so.

		Т	F
1.	All people in Thailand respect the Royal Family highly		
2.	A local person gives a "wai" to you, and you respond by saying "hello" if you are foreigner.		
3.	The feet maybe considered to be dirtiest part of the body.		
4.	Never touch people on the head because the head is considered to rest on the pillow.		
5.	Remember to remove your shoes before entering a building.		

V)-Read the passage about ancestor worship, and do the tasks that follow.

Ancestor worship is a religious <u>practice</u> based on belief that one's ancestors process supernatural powers, such as gods, angels, saints, or demons.

Ancestor worship in some cultures honors the <u>deeds</u>, memories, and sacrifice of the dead. Much of the worship includes visiting the ancestors at their graves, making offerings to them to provide for their welfare in the <u>afterlife</u>.

Spirit money (also called Hell Notes) is sometimes burned as an offering to ancestors as well for the afterlife. The living may regard the ancestors as "guardian angels" to them, perhaps in protecting them from serious accidents, or guiding their path in life.

Families burned <u>incense</u> every day on the domestic ancestral altar. In China, the family altar houses the family spirit tablets. On the outer surface of the spirit tablet is engraved the year of the death, his full name, and the name of the son who erects the tablet.

Anniversary <u>rites</u> take place on the death date of each major deceased member of the family every year. Sacrificial food is offered, and living members of the family participate in the ceremony in ritual based on age and generation.

Task 1: Match a word in column A with its definition in column B, writing the answer in each blank.

Answer	А	В
	1. practice	A. the life which some people believe begins after death
	2. deed	B. a substance that produces a sweet smell when burned, especially in religious ceremonies
	3. afterlife	C. an action
	4. incense	D. a ceremony, often for religious purposes
	5. rite	E. doing something many times

Task 2: Read the passage again, and then answer the following questions.

6.	Why does ancestor worship become a religious practice?
7.	What are the activities of the worship?
8.	Why do people burn spirit money for their dead ancestors?
9.	What can we see on the spirit tablet?
10.	When does anniversary rite for the major deceased member of the family take place?

VIII)-Read the passage about different customs for greetings around the world, and do the tasks that follow.

Greeting Customs Around the World

USA

It is normal for men to shake hands when they meet, but it is quite unusual for men to kiss when they greet each other. Greetings are casual – a handshake, a smile and a 'hello' will do just fine.

UK

The British often simply say 'hello' when they meet friends. They usually shake hands only when they meet for the first time. Social kissing is common in an informal situation between men and women and also between women who know each other very well.

France

The French, including children, shake hands with their friends and often kiss them on both cheeks, both upon meeting and leaving.

Arab countries

In Arab countries, close male friends or colleagues <u>hug</u> and kiss both cheeks. They shake hands with their right hand only, for longer but less firmly than in the West. Contact between the opposite genders in public is considered <u>obscene</u>. Do not offer to shake hands with the opposite sex.

Hungary

Hungarians like to use the friendly greeting form of kissing each other on the cheeks. The most common way is to kiss from your right to your left. When men meet for the first time, the casual greeting is a firm handshake.

Belgium

People kiss on one cheek when they meet, regardless of the gender or how well they know.

Chinese

Chinese people tend to be more <u>conservative</u>. When meeting someone for the first time, they would usually nod their heads and smile, or shake hands if in a formal situation.

Russia

The typical greeting is a very firm handshake while maintaining direct <u>eye contact</u>. When men shake hands with women, the handshake is not firm. It is considered gallant to kiss women three times while <u>alternating</u> cheeks, and even to kiss hands.

I)-Read the passage about the Pig Slaughter Festival and do the tasks that follow.

Viet Nam Pig Slaughter Festival

The traditional Pig Slaughter Festival is held on the 6th day of the Lunar New Year in Nem Thuong Village, in Bac Ninh Province. This festival is held to commemorate a general in the Ly Dynasty – Doan Thuong, who reclaimed this land. According to legend, the general brought his troops to this land and slaughtered with male pigs to feed his soldiers. The Pig Slaughter Festival originated from this. Pig blood in the festival is believed to symbolize prosperity, vitality and good harvest. However, the festival is known as the most brutal in the country, and many people have asked the government to stop the festival. "Animal Asia" – an international organization to protect anmal rights – is calling on the Vietnamese authorities to end the Nem Thuong Pig Slaughter Festival.

Nha Trang Sea Festival

Nha Trang Sea Festival takes place every two years for a week in around June in Nha Trang City, Khanh Hoa Province. This is a colorful and dynamic sea festival which honors natural beauty of Nha Trang – the charming city overlooking the sea. The first Nha Trang Sea Festival was held in 2003 when Nha Trang Beach was proclaimed as a member of the Most Beautiful Bays in the World Club. Coming to Nha Trang at the time

of festival, visitors will be able to take part in various cultural and recreational events. First of all is an abundant opening ceremony by Vietnamese and international art groups. Besides, many interesting activities also take place during the festival like seafood competition, wine festival, beach volleyball, art kite flying festival, underwater group wedding, etc. The festival is also a great chance for tourists to know more about Viet Nam through special events. Nha Trang Sea Festival will definitely give you an unforgettable impression about Vietnam's charming beauty as well as time-honored traditional values.

Ha Long Carnival

The festival is joined by thousand of actors, dancers, singers, musicians as well as students. Most of them are the local residents of Ha Long Bay. The highlight of Ha Long Carnival is street parades with variety of colorful costumes and dance on wide streets along the coast. Moreover, a laser, sound and water performance combining with a sparkling aerial firework show is an amazing party of light and color which tourist shouldn't miss at the festival. Ha Long Carnival is the heart of the series of events within the schedule of Ha Long Tourism Week – a tourism promotional celebration which has been held yearly for six years. It's usually taken place in a week in late-April to early-May. On the occasion of the 6th celebration in 2012, Ha Long Bay was officially recognized as one of New 7 Wonders of Nature of the world by the New 7 Wonders Organization.

- A. One day, Hou Yi met Wangmu (the Queen of Heaven) on the way to find his old friend. Wangmu presented him an elixir which, if took, would cause him to move up immediately to heaven and become a god.
- B. Your memory is good. And then Hou Yi took the food that Chang E liked to an altar and offered it as a sacrifice for her. After hearing that Chang E become a goddess, folk people also offered sacrifices to Chang E to pray for peace and good luck. Since then, the custom of sacrificing to the moon has been spread among the folklore.
- C. On hearing of this amazing feat and the hero who performed it, people came from far and wide to learn from him. Peng Meng was among these people. Later, Hou Yi married a beautiful and kind-hearted woman named Chang E and lived a happy life.
- D. On realizing what happened to his wife, Hou Yi was so sad that he shouted Chang E's name to the sky. He was amazed to see a figure which looked just like his wife appeared in the Moon.
- E. In some Asian countries, like China or Viet Nam, we accepted the story of Chang E the origin of the Mid-Autumn Festival.
- F. You're right. Three days later, while Hou Yi was out hunting, Peng Meng rushed into the backyard and demanded that Chang E should hand over the elixir. Knowing that she could not win, she took out the elixir and swallowed it immediately. The moment she drank it, she flew out of the window and up into the sky. Chang E's great love for her husband drew her towards the Moon, which is the nearest place to the earth on the heaven.
- G. It is said that in ancient times, ten suns existed and the extreme heat made people's lives very difficult. It was the hero Hou Yi, who, owing to his great strength, shot down nine of the ten suns.
- H. That's it. Unfortunately, Peng Meng secretly saw Hou Yi give the potion to his wife.

Phong: Hi, Nick. Nice to see you on Monday. Did you enjoy the Mid-Autumn Festival ir Viet Nam this year?
Nick: Hello, Phong. Thanks a lot. I really enjoyed this festival. It's for all teenagers like us.
Phong: Yeah. It's colourful and very exciting with moon cakes and the lanterns in al shapes.
Nick: But I had a question. Did the festival have an origin from any legend in your country?

The Emperor's New Clothes: a fairy tale by Hans Christian Andersen

Long ago, a foolish emperor didn't spend any time doing the things an emperor should do, but he was only interested in trying on new clothes and parading them in front of his people.

One day, two strangers arrived, offering the chance to try some magical cloth, which would be invisible to anyone who was a fool, or not suitable for their job.

The Emperor ordered some cloth to be prepared, paying two bags of gold for it. The Chief Minister and a servant couldn't see the cloth, but neither wanted to tell the truth because they didn't want to lose their jobs. The Emperor thought the same thing, and ordered a suit of clothes to be made at the cost of more gold.

The cheating strangers helped him into the imaginary clothes and he went on a procession through the town. Nobody wanted to admit that they couldn't see the clothes, until a small boy shouted that the Emperor had nothing on at all. This caused the rest of the crowd to start laughing. The Emperor just carried on with his parade – thinking the people were all the fools.

• Title: Hansel and Gretel

Genre: fairy tale (one of Grimm brother's fairy tales)

Plot: A woodcutter and his second-wife couldn't afford to feed his own children. The step-mother suggested leaving them in the forest for a while. The children, Hansel and Gretel, heard that and they left their home. Hansel used small rocks to mark the way back home. The two kids had no food when they found a witch's house made of bread, cake and sugar. Of course, they ate a lot and didn't die. The witch asked them to stay. After that, she locked up Hansel to fatten him, and made Gretel work hard around the house. This went on for a while until the witch decided to eat both of them. She asked Gretel to check the oven's heat from inside. Gretel tricked the witch into doing that instead. The witch was burned up and the children went home with a lot of her treasure. Unluckily, the stepmother died. The kids and the father lived happily ever since.

D. READING

I)-Read the following passage and then answer the questions.

Once upon a time, there was a girl called Cinderella who did all the work in the kitchen while her lazy sisters did nothing. One night her sisters went to a ball at the

palace, Cinderella was left a home, feeling very sad. After a time her fairy godmother appeared and told Cinderella that she could go to the ball, but she has to return home by midnight. So she went to the ball in a beautiful dress and a wonderful coach. She danced with the prince, but at midnight she ran back home, leaving one of her shoes on the dance floor. The prince wanted to see her again and went to every house in the capital until he found that the shoe was right size for Cinderella. The prince and Cinderella were married and lived happily ever after.

1.	Where did Cinderella's sisters go one night?

Da Trang and the Magic Pearl

Long ago, there was a hunter named Da Trang who lived near the edge of the forest. One day, when he returned from hunting, he was terrified to see two bright green snakes moving quickly moving quickly through the grass to the temple! But when he saw them raise their heads to listen to the <u>prayer</u> coming from the nearby temple, he thought, "They are surely harmless. Maybe they are <u>sacred</u> snakes."

When passing the temple one morning, Da Trang saw a big cobra, jaws open, attacking the snakes. He raised his <u>bow</u> and shot the cobra to save the snakes.

When the arrow struck him, the cobra <u>hissed</u> horribly and moved away as the male snake chased it down the hill. The female snake was badly wounded, and soon died. Da Trang buried her under the temple.

The male snake gave him a beautiful white pearl to allow one to understand the language of animals as a gift of its gratitude.

The King had Da Trang bring the magic pearl to the palace because the King was very enthusiastic to hear about the animals' conversation and spent a great deal of time listening to them.

One beautiful spring morning, the King and Da Trang went sailing. While the fish were singing happily, Da Trang burst out laughing and dropped the magic pearl into the sea.

Da Trang ordered an army of workmen who brought hundreds of cartloads of sand to the seashore to fill up the sea to find his lost pearl, but he failed and died. Before death, he asked to be buried near the seashore.

Nowadays, when you are at the seashore early in the morning, you can see many small crabs, believed to do the work of Da Trang.

V)-Read the legend, and put the following paragraphs into the correct order. Write the answer (B-G) in the blanks. The first paragraph (A) has been done for you.

Legend of the Water Melon

0.	A. Once upon a time, the sixth son of King Hung the Fifth named An Tiem
	disobeyed the King's order and was asked to move to a deserted island.
	35 B. King Hung was very proud of having a son who was brave
	and strong enough to overcome difficulties without anyone's help. An Tiem was
	immediately called back to the court. He brought his fruit with him to offer the
	King, his father. The King gave him his crown and An Tiem became King Hung the
	Sixth.
	36 C. An Tiem carved the island' name and his own on some of the
	fruit and threw them into the sea. Later, seamen found the strange fruit with An
	Tiem's name floating in the sea.
	37 D. Since then the fruit which was called "dua hau"has become
	the symbol of luck. People often offer it to relatives and friends as a New Year
	present.
	38 E. When the dry season came, all the plants were dry and the
	well had no water left. One day An Tiem was so tired and thirsty that he tasted
	the fruit. He found out that it tasted delicious and satisfied his thirst. He tried to
	grow the plant around his house then. Soon the whole island was covered with
	the green fruit.
	39 F. Soon, words about the fruit reached the mainland and many
	merchants tried to find the way to the island. The island was now crowded.
	Many boats came and went. An Tiem helped anyone who wanted to settle on
	the island. Soon, news about that reached the King.
	40 G. The Prince had to build his own shelter, dig a well for water,
	and fish and hunt animals for food. One day, he found a green fruit as big and
	round as a ball. He split the fruit into halves and found the inside of the fruit red.
	He did not eat it because he was afraid it was poisonous.

Kitchen Gods

Once upon a time, there was a <u>childless</u> couple. The wife was faithful and loved the husband passionately while the husband was treated his wife badly. One day he beat the poor wife with a stick and <u>dismissed</u> her from home. The women had to come to another place. She then got married with a kind man, and they lived in harmony.

One afternoon when her husband had gone for hunting, a beggar came and asked for some food. The woman was kind; she filled the poor beggar's bag and recognized that the beggar was her former husband. The man also recognized his wife then. She felt sorry for the man when hearing that from the day he dismissed her, he was deeply sad and regretful. So he decided to go away to find her until he spent all money and became a beggar.

After being offered a big meal, the man was drunk so the woman had to drag him out and hid him in a stack because it was time for her recent husband to come back from the forest.

After a while, there was a knock at the door, the hunter appeared with a deer on his back. He then happily asked the woman to go to the market to prepare for the dinner. When the woman came back, she found that the stack of straw, where the drunk former husband was sleeping, had been burned with a deer roasted. She cried painfully, and then jumped into the fire. The hunter didn't know what had happened and what to do but jumped into the fire to die beside his wife.

At that moment, God was in the heaven, he was <u>moved</u> by the story so he turned three of them into three parts of the earthen tripod so that they could live side by side forever and <u>conferred</u> them with the title of Kitchen Gods to <u>oversee</u> all the cooking of people. Every year, they all together came back to the heaven on the 23rd of the 12th lunar month to report to God.

- A. If you are a guest, it is polite to wait until your host starts eating or indicates you should do so. It shows consideration.
- B. When you have finished eating, and to let others know that you have, place your knife and fork together, with the prongs on the fork facing upwards, on your plate.
- C. Yeah, of course, Mai. First, we are expected to eat properly with cutlery, especially fork and knife.
- D. Right. Hold your knife with the handle in your palm and your fork in the other hand with the prongs pointing downwards.
- E. You may eat chicken and pizza with your fingers if you are at a barbecue; otherwise, always use a knife and fork.
- F. If you have a knife in one hand, it is wrong to have a fork in the other with the prongs pointed up.
- G. Yes, they are sandwiches, crisps, and fruit.
- H. Well, the fork is held in the left hand and the knife in the right.
- I. Always say thank you when you arc served something at a party. And in a restaurant, it is normal to pay for your food by putting your money on the plate which the bill comes.
- J. Of course not. Rest the fork and knife on the plate between mouthfuls, or for a break for conversation.

Australian Customs

Men usually shake hands firmly the first time they meet. Women may or may not shake hands. "How do you do", "Good morning" and "Good afternoon" are formal greetings. Usually students and young people just say "Hello" or "Hi". People often appreciate it if you add their name, for example "Hi. Linda".

Whenever you receive an invitation formally in a written note or informally by telephone, it is good to reply quickly and honestly. On a written invitation, "RSVP," means, "Please reply" by the date that is stated. It is usual to ring and tell your friend if you have to change your plans or if you are delayed.

When you are invited to join friends for an outing to a restaurant or the theatre you will usually be expected to pay for your own meal or tickets.

Don't be worried if you are not fluent in the English language. If an English speaker is speaking too fast, ask them to speak a little more slowly.

Some questions are not asked in Australia unless you know a person very well or unless you are related to them. Don't ask someone their age, especially an older person, and don't ask men or women how much money they earn. Questions about the cost of a person's house and the cost of the various things they own are considered impolite in Australia. If you would like to know the cost of something, ask the question in a general way. For example, you could say, "How much does the average house cost in Sydney?"

VII)-Read the articles about the two famous festivals in Viet Nam, and then do the tasks that follow.

Cow Racing Festival

The purpose of Cow Racing Festival is to celebrate the last day of the year, according to the Khmer calendar. The festival takes place within the region of Seven Mountains, An Giang Province, from the 29^{th} day of the 8th lunar month to the 2^{nd} day of the 9^{th} lunar month.

Before the competition, from several villages of An Giang Province, best pairs of cows chosen for joining the activity go under special treatment for months. They are well fed and traditionally taught. On the racing day, pairs of cows perform their skills on a rice field which must be really muddy and in a length of 120 meters.

When the race starts, with each pair of cows, the rider, holding a <u>tow</u>, will make them run as fast as possible by slashing. However, within a pair, the cows must maintain a same speed. The race is a circular track, including two <u>laps</u>. In the first round, pairs of cow are under control, while, in the second one, there is no holding back. The pairs which remain until the end of the event and manage to reach the finish

line before their competitors will be the winners. The rider leading their cows to the first position will be awarded the greatest honor — the bravest rider in the region.

Elephant Racing Festival

To local people in Central Highlands, the elephant has become a close friend with humans as they help people in working, transporting, and traveling. To express the <u>bond</u> between human beings and this friendly <u>creature</u>, Elephant Racing Festival, one of the biggest festivals in Central Highlands, is held annually in the third lunar month.

As preparation for the festival, villagers feed their elephants with a wide range of food apart from grass, including corns, sugar canes, sweet potatoes, papayas, and bananas. Also, in order to preserve their strength, the elephants take a rest without hard work.

Attending the event, festival goers are in their most beautiful and colorful holiday clothes. On this day, elephants from several villages gather at Don Village. Each time, ten elephants will run at the same time for about one or two kilometers. Therefore, the track's ground should be large enough. The competition is guided by the sound of $tu\ va$, a kind of horn. The first elephant which reaches the appointed destination will receive a <u>laurel wreath</u> as a sign of victory, and it will enjoy the achievement excitedly with sugar canes and bananas from surrounding people.

Saint Chu Dong Tu Festival

Saint Chu Dong Tu is one of the four <u>immortal</u> gods in Viet Nam. It is a popular religious festival celebrating Godfather Chu Dong Tu, who discovered culture, conquered <u>marsh</u>, and developed agriculture and trade in the Vietnamese society. The festival is a <u>joyful</u> occasion, including several events such as a <u>procession</u>, religious ceremonies, feasting, music and dance and children's games. The procession includes musical bands, and eight weapons for ornaments and big pots. They sit on tens of boats, rowing to the middle of the river, scooping water into the pots and coming back to bathe the statue. After the purifying ceremony, you will be treated with various forms of entertainment like wrestling, fighting with sticks, <u>human chess</u>, traditional and religious dances and *cheo* traditional music.

There are many causes that lead to water pollution. One main cause of this issue is waste water coming from many factories and then being directly pulled out into water bodies, especially into rivers or seas without any treatment because this is the most <u>convenient</u> way of disposing waste water. Industrial waste consists of some kind

of chemical substance such as sulphur, which is harmful for <u>marine</u> life. Lead is known as the main reason for cancer disease. Cancer has become a popular disease in several communes which is called "cancer villages. Another cause is the <u>awareness</u> of citizens, people always use water for many purposes and then they dump waste water or garbage directly into rivers, canal, and ponds and so on. In 2004, because of bird fly <u>outbreak</u> in Vietnam, people threw <u>poultry</u> to water body that made water highly polluted.

Space Pollution

The launch of Sputnik I and Yuri Gagarin, the first human being in space, marked the beginning of space exploration and the beginning of a new and unfamiliar type of pollution.

Satellites, solar panels, rocket bodies and fragments from space <u>shuttles</u> that are floating in space and are no longer <u>functional</u> are considered space <u>debris</u>. This pollution of <u>man-made</u> objects in space affects us here on Earth as well and will continue to affect us in future travel. In 1978, the Soviet Union Kosmos 954, which contained a nuclear power source, reentered over Canada and left debris over an area the size of Austria. In 1969, five Japanese sailors were injured by pieces of space debris that hit their ship. The largest piece, weighing one thousand pounds, landed in Australia in 1979.

Many <u>solutions</u> are being considered by scientists and engineers. However, the challenge to finding a solution lies within all of the nations which take part in the space exploration.

Bike Capital of the World

Copenhagen has over 390 kilometers of bike lanes and is widely <u>regarded</u> as the bike capital of the world. The Danes are <u>well-known</u> for their love of cycling, and Copenhagen's network of bike lanes is studied by other cities.

Cyclists in Copenhagen are saving the city 90,000 tons of CO_2 emission <u>annually</u>. Every day, about 789,000 miles are cycled in Copenhagen. Thirty-six percent of the city's residents bike to school or work. The city is looking to increase that number to 50% by building more bike lanes, widening existing lanes, creating biking —only bridges over the city's waterways, providing more <u>space</u> for parking bikes, and improving safety along existing bike routes.

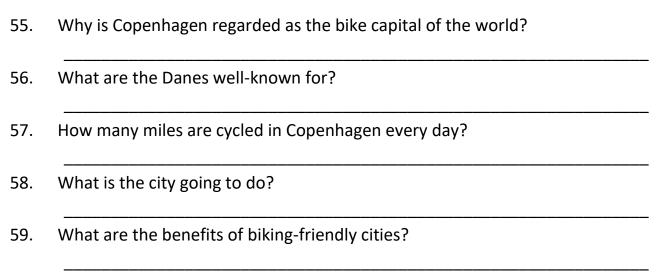

The city of Copenhagen clearly understands the value of biking-friendly cities. They are healthier, more environmentally-friendly, and allow for better <u>quality</u> of life.

Saving the Environment: One Home at a Time

Pollution can be seen not only throughout the world, but also in our own homes. It comes from household chemicals, the amount of water people use and the waste people produce and throw away. What can be done to stop this pollution? Surprisingly, a person can help save the environment by doing simple things.

First, we need to recycle, which allows products to be used over and over again. Recycling can also reduce the number of trees cut down to produce paper products. It takes very little effort. It is not hard to place plastic and glass bottles, aluminum cans and paper in a bin. Anyone can do it.

Second, we need to watch the amount of water used in the home. It can be conserved by taking short shower instead of baths, repairing leaky faucets, using the

dishwasher or washing machine only when fully loaded, or simply turning the faucet off while brushing your teeth.

Third, we need to reduce waste. We need to recycle whenever possible, but should also try to use this waste effectively. For example, grass clippings and food scraps can be made into compost for plants. The average person produces 4.3 pounds of waste every day, but we can reduce that amount by recycling and reusing.

If we do our part in our own homes, we can help keep the planet from becoming more polluted.

The Hopi of Arizona

The Hopi live in the northwestern part of Arizona in the United States. With modern things all around them, the Hopi keep their traditions.

There are about ten thousand Hopi and they live in twelve villages in the desert. The weather is very hot in the summer, but in winter it freezes. The wind blows hard. Farming is difficult. Corn is the Hopi's main food, but they plant vegetables, too. They raise sheep, goats, and cattle. They also eat hamburgers, ice cream and drink soft drinks. They live in traditional stone houses, but many of them have telephones, radios, and television. They have horses, but they have trucks too.

Kachinas are an important part of the Hopi religion. Kachinas are spirits of dead people, of rocks, plants, and animals, and of the stars. Men dress as kachinas and do religious dances. People also make wooden kachinas. No two wooden kachinas are ever alike.

The children attend school, and they also learn the Hopi language, dances and stories. The Hopi want a comfortable, modern life, but they don't want to lose their traditions.

The Sydney Opera House

The Sydney Opera House is built on Bennelong Point, in Sydney Harbour, close to the Sydney Harbour Bridge. The first known concert on Bennelong Point was held in March 1791. Public pressure to build a suitable concert facility in Sydney became greater in the 1940s. In 1955, the New South Wales government announced an international competition for the design of "an opera house". Danish architect Jørn Utzon's entry was selected as the winning design. His design was for a complex with two theatres side by side on a large podium. This was covered by interlocking concrete shells, which acted as both wall and roof. A third smaller shell set apart from the others was to cover the restaurant.

The construction of the Opera House was sometimes difficult and <u>controversial</u> with Jorn Utzon resigning from the project in 1966. However, the Opera House was officially opened by Queen Elizabeth II on 20 October 1973. The Sydney Opera House became a UNESCO World Heritage Site in 2007.

Scotland: The Land of Legends

If we travel all over Scotland, we can see that it consists of three main parts: Lowlands, Uplands and Highlands with their Grampian Mountains, where the tallest mountain peak, Ben Nevis, is located.

You are sure to enjoy the beauty of the Scottish varied landscape: the hills covered with purple heather, its beautiful lakes (here they are called lochs), its green and narrow valleys.

The biggest and the most beautiful lake in Scotland is Loch Lomond, but the most famous one is Loch Ness with its mysterious monster Nessie. Nessie sometimes appears to scare the tourist but only in fine weather!

But what can be more curious and attractive for tourist than a man in the kilt, playing the bagpipes? The Celts of Scotland made the chequered pattern of tartan – the national dress of the country. The earliest Scots formed themselves into clans (family groups) and the tartan became a symbol of the sense of kinship. There are about 300 different clans in Scotland, and each has its own colour and pattern of tartan together with the motto.

Scotland is a land of many famous people: writer and poets, scientist and philosophers, such as Robert Burns, Arthur Conan Doyle, Alexander Graham Hell, or Alexander Fleming.

B. VOCABULARY AND GRAMMAR

I)-Match a word in column A with its description in column B, writing the answer in each blank.

Answer	А	В
	1. A thunderstorm	A. It is created when the surface layer of the ground collapses. It varies in size and are found all over the world. It is an area of ground that has no natural external surface drainage. When it rains, all of the water stays inside it and typically drains into the subsurface. It can vary from a few feet to hundreds of acres and from less than 1 to more than 100 feet deep.
	2. A tornado	B. The Earth has a crust under the oceans and the land that we live on. This crust made of massive areas of flat rock called tectonic plates, which float on the Earth's mantle, the inside layer of the Earth. When the plates move slowly together, this movement forces energy through the crusts to the

	Earth's surface. The energy causes the Earth to tremble and shake.
3. A hurricane	C. It is a very bright flash of electricity that happens in a thunderstorm. It is actually a spark that crosses the gap between two clouds or between a cloud and the Earth. It carries an enormous charge of electricity. Trees are burned, metal can be melted and people can be killed.
4. An earthquake	D. It is caused by earthquakes at sea. It forms when energy from an earthquake displace hundreds of cubic kilometers of water from the seabed. Large waves begin moving through the ocean from their epicenters. When it reaches shallow water near coastal areas, it increases in height. The sign comes before it strikes when the waterline suddenly retreats, exposing hundreds of meters of beach and seabed.
 5. A volcano	E. It is a very violent windstorm. The air is concentrated and whirls up rapidly. It is grey in colour and looks like an elephant's trunk swaying down from the clouds to touch the ground with its tip.
 6. A tsunami	F. It is a hill or mountain formed when molten material or lave from the inside of the Earth is forced through the Earth's crust by gases. It can produce vast clouds of very fine volcanic dust which looks like smoke.
 7. A sinkhole	G. It is a storm where you hear thunder and see lightning. There is usually heavy rain. It is an electric storm.
 8. Lightning	H. It is the most violent storm known on Earth. It is a tropical storm. It forms at sea and causes dangerous, stormy seas. It can reach the land and destroy buildings and trees. It can blow high waves

		onto the land and cause flooding.

I. Duong: What are the levees, Nick?
J. Nick: At first, it was only a tropical depression, and then it quickly grew in strength and soon became a tropical storm.
D. READING
I)-Read the following brochure, and then tick (\checkmark) the statements that the article recommends.

A Family Emergency Plan

The best way to deal with an emergency or a disaster is to prepare for it before it happens. You can do this by making a family emergency plan. Here are some tips on how to prepare one.

- Put a list of emergency phone numbers, including the police, fire, and emergency medical department near every phone.
- Make an emergency supplies kit. This should include canned food, bottled water, flashlights, matches, batteries, blankets, a battery-operated radio, a first-aid kit, etc.
- Teach responsible family members how and when to shut off water and electricity sources in the house.
- Learn basic first aid.
- Decide what you will take and where you will go if you have to evaluate.
- Decide what to do if your family is separated. Choose a place to meet in case you can't return to your home.

·				
Regularly review and practice your plans. 1 Have a plan in case there is an experience and dispetant.				
 Have a plan in case there is an emergency or disaster. 	Ц			
2. Write down emergency telephone numbers.				
3. Gather together some things you might need in an emergency.				
4. Show young children how to turn on and off the water and electricity.				
5. Know how to use the items in a first-aid kit.				
6. Decide when to evaluate.				
7. Find a place for everyone in your family to go if you aren't together.				
8. Practise your plans one time.				
II)-Choose the word or phrase among A, B, C or D that best fits the blank space in the following passage.				
El Nino is a weather phenomenon of the Pacific Ocean which is (1)				
by an abnormal (2) of water on the surface of the ocean. It	has the

III)-Read the article about storm chasing, and then decide whether the statements are True (T), False (F), or No Information (NI)

Storm Chasers

Tornadoes. Hurricanes. Enormous storms. Just reading these words make people imagine disastrous events that can cause countless injuries and severe damages. No one looks forward to weather reports or breaking news that announces these natural disasters. No one, except a small group of about 100 people known as "storm chasers".

Who are these people, and what do they do? A storm chaser is a person who tries to get as close to a severe storm as possible. A few storm chasers are scientists who want to learn more about storms and how they develop. They want to be able to learn more so that someday they can better predict when and where storms will occur. With more information, they could help people avoid the severe destruction and high casualties that often happen when huge storms hit. Others are professional photographers, film makers, or TV reporters. Some are tour guides who take people close to the fascinated by nature and chase storms as a hobby.

Storm chasers study weather data and look closely at the sky to guess the timing and location of storms when they form. They hope to be there when a tornado forms

and to follow it as it touches ground. If they are lucky, they will catch a tornado at least once in every five to ten trips.

In 1996, the thriller "Twister" introduced storm chasing to filmgoers. Since then, a lot of people have been fascinated by the topic. There have been TV shows, and hundreds of books about this exciting "sport".

But storm chasing is not for everyone. It is a dangerous hobby. Roads are often wet and dangerous to drive, severe floods can wash away cars, and lightning storms can cause casualties.

		T	F	NI
1.	Storm chasers look for opportunities to study and photograph huge storms.			
2.	There are a lot of women storm chasers.			
3.	There are over 1,000 people who are storm chasers.			
4.	Storm chasers look forward to tornadoes.			
5.	Storm chasers know exactly when a tornado will hit a town.			
6.	There are TV shows about storm chasing.			
7.	"Twister" is the best film about storm chasing.			
8.	Storm chasing is easy.			

IV)-Read the text carefully, and then do the tasks that follow.

In April 2010, a group of 14- and 15-year-old students from Loughborough, in the UK, went to Iceland on a school trip. They wanted to see things they studied in their Geography lessons at school so they visited an area which has a lot of active volcanoes. However, in the middle of the night on Tuesday 13th April the Eyjafjallajökull volcano began to erupt.

Emergency services woke up the students and their teachers in their hotel at 4am. They didn't have time to get dressed and left in their pyjamas. A bus took them to Reykjavik, the capital of Iceland, where they were safe.

When Eyjafjallajökull erupted, it affected people all over the world. In the local area 800 people left their homes immediately because of floods from local rivers and dangerous smoke and gases. The volcano also sent a big cloud of ash 8km up into the air. This was dangerous for planes because the pilots couldn't see in the ash cloud.

Many countries in Europe, including the UK, France, Sweden and Norway, closed their airports for many days in April. Thousands of travellers around the world couldn't get home. They slept in airports or tried to get to their destinations by car, train, bus or even taxi.

Icelandic volcanoes are very active. When the volcano Laki erupted for eight months in 1783, almost two million people died around the world. It was the worst volcanic eruptions in history. The students from Loughborough were lucky!

A/-Choose the best title for the text.

- 1. Geography lessons in Iceland
- 2. Thousands of people can't fly to Iceland
- 3. Students escape when the volcano erupts

B/ Read the text again, and identify whether the statements are True (T), False (F), or Not mentioned (NM).

		Т	F	NM
1.	The students learned about volcanoes before they went to Iceland.			
2.	They stayed near the Eyjafjallajökull volcano.			
3.	The volcano woke up the students.			
4.	The students enjoyed their trip to Iceland.			
5.	The eruption of Eyjafjallajökull didn't affect local people.			
6.	In April 2010 many airports closed in Europe.			
7.	Volcanoes in Iceland do not erupt very often.			
8.	The eruption of Laki in 1783 wasn't very big.			

V)-Read Mary Ann's story, and answer the questions.

In 1969, Hurricane Camille hit my three-storey blocks of flats near the Gulf of Mexico. First, the sea hit the building and all the windows broke. Then the room flooded. Five minutes later, my bed was floating near the ceiling. Then it floated out of the window. It was dark and the wind was howling. I was terrified. The building was falling down all around me. The wind was awful. It reached a speed of 234 miles per hour. I was cut and bleeding from head to toe. Finally, someone found me 8 km from my house and they took me to hospital.

1.	When did Hurricane Camille hit the Gulf of Mexico?
2.	What happened after the rooms flooded?
3.	What happened to the building?
4.	How fast was the wind?
5.	How far did the water carry Mary Ann?

VI)-Read the following passage carefully, then write True (T) or False (F) for each statement.

The people of Kiribati are afraid that one day their country in the not-too-distant future will disappear from the surface of the earth. Several times this year, the Pacific island nation has been flooded by a sudden high tide. These tide, which swept across the island and destroyed houses, came when there was neither wind nor rain. This never happened before.

What is causing these mysterious high tides? The answer may be global warming. When fuels like oil and coal are being burned, pollutants are released, these pollutants hold heat in the earth's atmosphere. Warmer temperatures cause water to expand and also create more water by melting glaciers and polar ice caps.

If the situation continues, scientists say that many countries will suffer, Bangladesh, for example, might lose one-fifth of its land. The coral island nations of the Pacific like Kiribati and the Marshall Islands, however, would face an even worse fate –

they would be swallowed by the sea. The loss of these coral islands would be everyone's loss. Coral formations are home to more species than any other place on the earth.

		Т	F
	1. In Kiribati there were sudden high tides coming when there was no wind or rain.		
2.	High tides without wind or rain often happen in Kiribati.		
3.	Global warming is definitely the cause of those mysterious high tides.		
4.	The loss of coral islands doesn't affect people on the earth

VIII)-Choose the item among A, B, C or D that best answers the question about the passage.

How can scientists predict earthquakes? Earthquakes are not scattered anywhere but happen in certain areas. They happen in places where pieces of the earth's surface meet. For example, earthquakes often occur on the west-coast of North and South America, around the Mediterranean Sea, and along the Pacific coast of Asia.

Another way to predict earthquakes is to look for changes in the earth's surface, like a sudden drop of water level in the ground. Some people say animals can predict earthquakes. Before earthquakes people have seen chickens sitting in trees, fish jumping out of the water, snake leaving their holes and other animals acting strangely.

After an earthquake happens, people can die from lack of food, water and medical supplies. The amount of destruction caused by an earthquake depend on types of building, soil conditions and population. Of the 6000 earthquakes on the earth each year, only about fifteen cause great damage and many deaths.

1.	Earthquakes happen in certain areas whe	re

Earthquakes

Earthquakes are among the <u>deadliest</u> natural disasters, causing the largest numbers of <u>casualties</u>, the highest death tolls, and the greatest destruction. In 1556 in China, the deadliest earthquake in history killed 830,000 people. But many other earthquakes have caused the deaths of more than 100,000 people, and it is not unusual, even in modern times, for an earthquake <u>death toll</u> to reach 20,000 to 30,000 people with hundreds of thousands left homeless and with <u>countless</u> injured. The floodwaters of the 2004 tsunami in Sumatra, which killed over 200,000 people, were caused by a <u>catastrophic</u> earthquake.

D. READING

I)-Read about Michelle and Kenji and choose the correct answer.

Linking the World

Because of the Internet, people from all over the world can now be friends even if they never meet. Michelle and Kenji are online friends. They tell us how they use their computers.

Michelle, 15, New York, USA

"When I'm doing a school project, I use my computer to go online and search the Internet for information. Then I write the project on the computer. Right now I'm doing one on the Brazilian rainforest. If I find some good photos, I'll include them. And, of course, I use my computer to stay in touch with friends like Kenji"

Kenji, 14, Manchester, UK

"I'm on my computer from eight until ten o'clock every evening. I use it to chat to Michelle, play games, to check the latest football news and to chat about my favourite team, Manchester City. If they win the match this Saturday, I'll be really happy. Unfortunately, Michelle is a Manchester United supporter!"

III)-Read the passage carefully, and then answer the questions below.

Getting In Touch Through The Ages

Nobody knows who wrote the first letter or when, but we know that 4,000 years ago in Ancient Egypt people carried letters by hand over hundreds of kilometers. Very few people could write, so there were special people, called scribes, who wrote letters for everyone else.

The first stamp didn't appear until 1840 and it cost just one penny. Nowadays one of the original stamps cost €375. Letter writing was so popular in the 1840s that people delivered the post several times a day.

An American company - Remington and Sons - made the first typewriter in 1871. All the letters in the word 'typewriter' were on the top line of the keyboard so that salesmen could demonstrate the machine more easily. Amazingly, the letters are still in the same place on the modern computer keyboard!

In 1875, when Alexander Graham Bell demonstrated a fantastic new invention called the telephone, nobody was very interested in it. The first fax machine appeared

at around the same time, but it was so enormous that no one wanted one - in fact, fax machine didn't become popular for another hundred years.

Then there was the walkie-talkie, a small two-way radio first used by the US army in the 1930s. However, since they weighed around 13.5 kilos, the talking was perhaps easier than the walking! After World War Two, they became popular with police officers.

Nowadays, we can send messages and pictures around the world in a few seconds using computers and mobile phones. It is hard to believe that e-mail was only invented in 1971, and the first text message was sent in 1992. Today we send over a billion text messages around the world every single day, and an incredible thirty-six billion e-mails.

1.	How did people deliver letters in Ancient Egypt?
2.	How much did the first stamp cost?
3.	How often did they deliver letters in the 1840s?
4.	How are the letters arranged on a modern computer keyboard?
5.	When did the first fax machine appear?
6.	Why was it difficult to walk with the first walkie-talkies?
7.	When was the first text message?
8.	How many e-mails do we send every day?

IV)-Read the text, and match the headings (A-F) with paragraphs (1-5). There is one extra heading that you do not need.

- A. Why do "friends" websites seem dangerous?
- B. How do "friends" websites work?
- C. What's the best advice for people who want to use "friends" websites?

- D. Where do Millie's friends live? E. How can I find "friends" websites? F. Why are "friends" websites popular? 1. \square Millie is 14 years old and lives in Miami. She has 204 friends - and she makes two or three more friends every week. About 20 of her friends also live in Miami. Some go to the same school, and others go to the same music clubs and sports centers. She often sees them. The others live in other cities and other countries: England, Canada, Japan ... She never meets these friends, but she talks to them on the Internet. They are her "MySpace Friends". 2.

 Because of websites like MySpace, Yahoo, 360 and Bebo, people can make friends online. These websites are very popular all over the world, especially with young people. Users have their own homepage. They give information about themselves. They write letters for their webpage, show photos and give opinions. They write about their favourite films, music and TV programmes. 3. \square For many young people, a good homepage is an important part of their image. It says: "This is me! I have something to say. These things - and these people - are important in my life." And these websites are also an easy way to talk to a lot of different people. That is why teenagers like these "friends" websites.
- 4. ☐ But some people are worried that these websites aren't safe. For example, it is impossible to know that the information on a homepage is true. Perhaps the 14-year- old girl you talk to online is really a 40-year-old man. So here is some advice.
- 5.

 Keep your webpage private. (Only friends can see a private homepage.) Do not put photos of yourself on your homepage. Do not meet people that you only know because of the website. And finally, remember that online friends are fun, but they are not the same as real friends.

V)-Four people have talked about what they have done in their free time so far this week. Answer the questions below.

Nick: I've spent about thirty hours on the Internet so far this week. I'm really into it. I usually go on about 9.00 in the evening after dinner and homework. I maybe stay on until half past eleven in the evening when the rest of my family are all in bed.

Mi: I haven't watched any TV so far this week. I don't have a television. I hate television - it's really bad for you.

Phong: I haven't written any letters so far this year. Nobody writes letters these days, do they? I always send e-mails or cards if it's a birthday or something personal.

Mai: I don't know how many books I've read so far this year ... too many to count. I've read five books this week. I usually read about four or five in a week. I love reading. If I really like a book, I might read it five or six times.

1.	How many hours has Nick spent on the Internet this week?
2.	When does Nick often go to bed after going on the Net?
3.	Why does Mi hate television?
4.	How can Phong communicate with others?
5.	How many books does Mai read in a week?

Mind-blowing facts about modern communication

The Internet holds about 5 million terabytes of data. That's about the same as 1 million human brains. According to experts, there are about 2 billion Internet users in the world. 70% of people in developed countries go online, but only 20% of people in developing countries can access to the Internet.

The average <u>Internet user</u> has 25 <u>online accounts</u> and logs in 8 times a day. 30% of Internet users have just 1 password for all their online accounts, and the most common password is "password1". About 55% of users choose words which have some personal meaning, and 15% write down both their password and <u>username</u>.

Many people use <u>Wi-Fi hotspots</u> in public places, such as café, airports and hotels. 46% of them are worried about viruses and <u>hackers</u>. Many people type in personal information while using public Wi-Fi: 22% regularly type in email passwords, 21% log onto Facebook and 8% do online banking, but they are unaware about how to be totally secure.

The first computer <u>virus</u> appeared in 1981. The first virus to affect mobile phones appeared in 2005. And the first <u>anti-virus software</u> came out in 1990. There are now about 6,000 new computer viruses every month.

87% of Internet users go online with their smartphone at least once a day. About 80% keep their smartphone turned on 24-7 and 23% use it during mealtimes.

500,000,000 people in the world have a Facebook account - that's about one in every 13 people. The average user has 130 "friends", and 48% of adults check their

Facebook page as soon as they wake up in the morning. Every 20 minutes. Facebook users around the world <u>upload</u> 2,716,000 photos.

C. SPEAKING

I)-Read the article about Tim Berners-Lee, the inventor of the World Wide Web, give the answers to the questions in the conversation, and practise it in pairs.

An ordinary life... an amazing idea

Tim Berners-Lee looks very ordinary. He is about sixty years old and has brown hair. He was born in England but now lives in Massachusetts in the USA. But in 1989 Tim had a very important idea. He invented the World Wide Web (www).

Tim went to school in London. Both his parents worked with computers so it isn't surprising that he loved computers from an early age. When he was eighteen, he left school and went to Oxford University where he studied physics. At Oxford, he became more and more interested in computers, and he made his first computer from an old television. He graduated in 1976 and got a job with a computer company in Dorset, England. In 1989, he went to work in Switzerland where he first had the idea of an international information network linked by computer. He decided to call it the World Wide Web, and he also decided to make his ideas free to everyone - that is why we do not pay to use the Internet.

In 1994, he went to live in the United States where he now works. In 1995, he wrote an article in the New York Times in which he said, "The web is a universe of information and it is for everyone." Today his idea of a web, where people from all over the world can exchange information, is real.

Tran Dai Nghia (1913-1997) - The Buddha of Guns

Professor, Academician Tran Dai Nghia is a heroic Scientist of Vietnamese intellectuals. In 1935, the young man Pham Quang Le, his real name, had a scholarship to study in France. He tried to take 6 college degrees and certificates of the most famous universities of France. Unlike the others, Pham Quang Le had a clear purpose when studying abroad. He studied the science of making weapons to serve the country's independence.

The meeting between him and President Ho Chi Minh in Paris in 1946 changed the life of Pham Quang Le. In 1946, under the requirements of the French war, he was assigned as Head of Military Department by Uncle Ho with the responsibility of researching, manufacturing weapons for our soldiers to fight the enemy. Uncle Ho said, "This is the good thing. So from now on your name is Tran Dai Nghia..."

In difficult conditions, Professor Tran Dai Nghia and his comrades made successfully bazookas, recoilless canons (SKZ), and flying bombs. In praise of the success of bazookas, when General Vo Nguyen Giap saw Mr. Tran Dai Nghia as a gentle and quiet engineer. General called him "The Buddha of guns".

In short, Professor Tran Dai Nghia contributed his entire life for the country, for the people.

Passage 1

Robert Hammond was driving home one night with his wife Judy when their car suddenly stopped. He turned the key but the car did not start. Judy looked at her watch. It was one minute before midnight and there were no other cars on the road. They were discussing what to do when they saw a bright light in the sky.

Robert opened the car door. Judy told him to stay in the car but he didn't listen. She watched her husband walk towards the light. He walked until he was under the light and stopped. Then suddenly the light disappeared and it was dark. It was also silent again. At the same time, the car started again. Judy looked at her watch again. It was still one minute to midnight. She waited for her husband but he didn't return. She called his name but there was no reply. Robert Hammond disappeared and his wife Judy never saw him again.

Passage 2

Mary was studying late one night for her final exams when she fell asleep in front of her computer. She started to have a really strange dream. She was wearing a white dress and she was lying on a bed. She tried to move but she couldn't. She looked up and saw two alien faces looking at her. They had big grey heads with large black eyes.

Then another alien arrived. He was carrying a large machine. He put something over her mouth. When Mary woke up, she was not in front of her computer. She was in her bed. Then she got up and looked into the mirror. Her two front teeth were missing.

A New Home

The president of the planet Trojan was standing in front of her palace. She spoke to all the people. "People of Trojan!" she said. "I have some bad news. Another planet is coming towards use. One hundred years from now, the other planet is going to hit us and destroy us. There is nothing we can do."

The Trojan people were very frightened. The president said more.

"Don't worry. We have a plan. We're going to build spaceships - the biggest spaceships in the history of universe. Each spaceship is going to carry 10,000 people - and we are going to build 20,000 spaceships! In this way, we can take every Trojan man, woman, and child to a safe place - before the other planet hits us"

The people asked, "Where? Where is this safe place?"

The president said, "There is another planet, very far from here. It is a planet where Trojan people can live. The air is like our air; the water is like our water, and there is room for us. The name of this planet is Earth!"

The next day, the people of Trojan started to build the spaceships. It took them a very long time - more than fifteen years - to build the first 1,000 spaceships. And after fifty years, 5,000 spaceships were ready. And finally, all the 20,000 spaceships were ready. The spaceships were round, like huge yellow footballs - so big that 10,000 Trojans could go inside each one.

Then, one day, the people of Trojan said goodbye to their borne. They got into the spaceships. And, one by one, the spaceships took off. And the Trojans began the journey to their new home.

20 years later, the spaceships landed on the planet Earth.

V)-Read the passage and then decide whether the statements are true (T) or false (F).

The International Space Station - the manned satellite - bus constantly circled the Earth in low orbit up to now. Since the first permanent crew moved in on 2 November 2000, 220 people representing 17 countries have come and gone. Most of those astronauts have been Americans on the space shuttle flights to deliver the equipment, food and other supplies.

Russia has sent the second largest number of people, with Canada and Japan tied for third. At least one American and one Russian have been on board at all times.

The ISS orbits 240 miles above the planet at 17,150 mph and can often be seen by the naked eye. The complex has grown from three to 13 rooms and the current structure has a mass of nearly 450 tons. More than 26,500 meals have been served. 1,760 experiments carried out and 189 spacewalks undertaken, according to NASA. The 189 spacewalks have been undertaken to build and maintain the space station.

The most important experiment, according to Commander Scott Kelly, was about keeping humans alive in space.

NASA administrator, Charles Bolden, called the 15-year milestone in 2015 "a remarkable moment". He added, "It has taught us about what's possible when tens of thousands of people across 15 countries work together with the shared goals."

VI)-Read the passage, and do the tasks that follow.

The New Horizons - a NASA <u>probe</u> - went past Pluto in summer 2015. Pluto was discovered by Clyde Tombaugh - an American <u>astronomer</u> - in 1930 as the ninth planet in the solar system. However, in January 19, 2006, Pluto was regarded as a <u>dwarf</u> planet. In the solar system, there are the inner rocky planets, such as the Earth, Mars, Venus and Mercury, and the outer gas giants, like Jupiter, Saturn, Uranus and Neptune. Pluto and its largest moon, Charon, belong to a third <u>category</u> known as "ice dwarfs". They have solid surfaces but, unlike the other planets, their mass is icy material.

The probe traveled more than 3.6 billion miles to take the photos. The new image shows a clear view of Pluto's surface, and it is covered with wide smooth areas, and mountains. Huge mountains are made of water ice. Scientists hope that information from the New Horizons will prove that there might be a lot of water on Pluto. Finding water on another world is important because water is considered one of the <u>key</u> materials to life.

Besides Charon, Pluto has four other small moons: Styx, Nix, Kerberos, and Hydra.

The New Horizon's mission makes the United States the first nation to send a space probe to every planet from Mercury to Pluto.

Task 1: Match a word in column A with its definition in column B, writing the answer in each blank.

Answer	Α	В
	1. probe	A. a scientist who studies universe
	2. astronomer	B. a group of people or things that are similar to each other
	3. dwarf	C. a small spacecraft with no one travelling in it

A UFO (Unidentified Flying Object) is any object flying in the sky which	ch can	not be

identified by the person who sees it. Sometimes the object is investigated. If people

cannot **figure out** what the object is after an investigation, it is called a UFO. If they figure out what the object is, it can no longer be called a UFO because it has been identified.

Even though UFOs can be anything, people can use the word UFO when they are talking about alien spacecraft. Flying saucer is another word that is often used to describe an identified flying object.

Studies estimate that 50-90% of all reported sightings are identified later. Usually 10 - 20% are never identified. Studies also show that very few UFO sightings are hoaxes (people trying to trick other people). Most UFOs are actually natural or man-made objects that looked strange. 80-90% of UFOs are identified as one of three different things: (a) astronomical causes (for example: planets, stars, or meteors); (b) aircraft; and (c) balloons. 10-20% of UFOs are other causes, such as birds, clouds, mirages, searchlights, etc.

IX)-Rea	X)-Read the passage carefully, and then answer the questions below.					

Neptune, like the other gas giants in our solar system, doesn't have much of a solid surface to live on. However, the planet's largest moon, Triton, might make an interesting place to set up a space colony.

So far, only a spaceship has ever flown flew by Neptune and its system, and was able to photograph the southern hemisphere of the moon.

Images show that Triton's surface is mostly made up of rock and nitrogen ice, and there are smooth areas next to volcanos. The smooth areas are formed by clouds of dust and nitrogen gas which erupt from the volcanos.

62. What is Triton?

X)-Look at the sample essay about computer games. Fill in each blank of the outline with a phrase not more than 3 words.

Many people think that computer games are only harmful to humans. Studies discovered that playing games overtime could cause health risks such as obesity, eye damage. Most game players don't exercise; instead, they eat junk food, which is not good for our health.

However, playing computer games makes the players think critically, in order to win matches or proceed to the next stages of the game. Some of the games are very difficult and no one can win easily, unless he thinks for a while. I believe it is good for the players, because they learn how to think, plan ahead strategically and solve their problems.

Moreover, we can relax our mind by playing computer games. After a day of hard working, playing such games can be a good way to have relaxation. In addition, computer games create a friendship and have become a tool to build strong relationship between friends.

In conclusion, playing computer games results in both positive and negative effects on our lives.

Social media can be the start of bad things like cyberbullying... The recent reports about the matter say that many teenagers have online contact with strangers, and it makes them feel scared or uncomfortable. Others have received online advertising that was inappropriate for their age. It is important for parents to be aware of what their children are doing online. Parents should make their children understand that they respect their children's privacy. However, parents want to make sure (that) their children are safe.

Subject: English Essay from Nguyen Thi Mai

Dear Ms. Lan,

My name is Nguyen Thi Lan, and I am your student from class 8C. I have attached my essay on "Communication in the 21st century", which is due by the end of today. Thank you for allowing me to email it to you instead of turning it in during class. I really appreciate if you give some comments on my essay so that I will write better in the near future.

Thank you so much.

Best regards, Nguyen Thi Mai

deadline of the report, due last week. I promise that this thing does not happen again. I hope for your kind understanding, and accept my late submission.

Best regards,

Hoang Diem Mi

X. Dear Ms. Huong,

I am sorry that I was absent from your Biology class yesterday. A classmate told me that handouts for the next lab assignment were given. We have to submit our assignments next Friday. Can I meet you during tomorrow's recess to ask some questions about the correct way to write it? I look forward to speaking to you soon.

Thank you very much.

Best regards,

Pham Van Phong

E. WRITING

There are several advantages of smartphone. Smartphones give users the ability to surf websites instead of using a desktop or a laptop. They also have applications which help us to create and edit Microsoft office documents. Smartphones have GPS which helps us to find the place we are looking for. With a smartphone, we can have access to any email accounts, like Outlook or Gmail, social networking sites, such as Facebook and Twitter. However, smartphones have some disadvantages. Smartphones are not durable, especially when they are not taken good care of. It is very expensive to buy smartphones compared to other phones. Smartphones can only work efficiently when there is an Internet connection. You cannot depend on smartphones for all your work but you need a computer to do some tasks.
